

# The Clinical Trial Experience

Designed for those with little or no knowledge of clinical trials or drug development this exciting, creative, hands-on training uses easy-to-perform, easy-to-understand activities to take you through a clinical trial, from start to finish; from study design to final results.

*The Clinical Trial Experience* is a hands-on workshop where participants run their own clinical trial, enabling them to appreciate why good design, careful control and good life skills are essential for smooth running and delivery of accurate and meaningful results.

We understand that workshops are not always practical or appropriate, so we also deliver our training using a range of interactive talks and presentations (typically 45 minutes to 1 hour). Training may be delivered one-to-one or to a larger group. The content, length and style of each training event is specifically tailored to the needs, objectives and make-up of the target audience.

## Who is it for?

Undergraduate and post-graduate members studying science, social sciences, psychology, pharmacy and medicine. Members of professional societies considering a career in clinical research, or career options in the pharmaceutical industry. Information on clinical trials, clinical research and drug development may also be presented at local or regional meetings and as after dinner talks.

### Key benefits of The Clinical Trial Experience include

- ✓ Understanding the importance of clinical trials in drug approval
- ✓ Understanding robust experimental design and control for reliable results
- ✓ Hands-on experience reinforces & expands on theory
- ✓ Improved team, analytical & interpersonal skills
- ✓ Increased self-confidence, self-esteem and sense of achievement

## Trainer & Training

The trainer, Dr Stuart Wood, worked in clinical research, training and education in the pharmaceutical industry for more than 18 years and specialises in making complex processes easy to understand by everyone. All training is specifically tailored to the needs, experience and ability of each audience and delivered at a venue of the client's choice. *The Clinical Trial Experience* workshops typically last for 3 hours (½-day).

*'Stuart is a rare individual. His ability to create sense from chaos, to distil clarity of thinking from murky waters and to impart technical knowledge in a way that makes it all seem simple, is a unique gift. His dry humour and ability to view things from a different angle, was of huge value and support to me in my role. Always challenging and thorough in his dissection, Stuart was great to work with and made meetings interesting! Put simply, he is a man many could learn from, pragmatic, human, reflective and passionate about the positive impact of what he does.'*

**SM : DeMontfort University, Leics.**
